Crit Hit

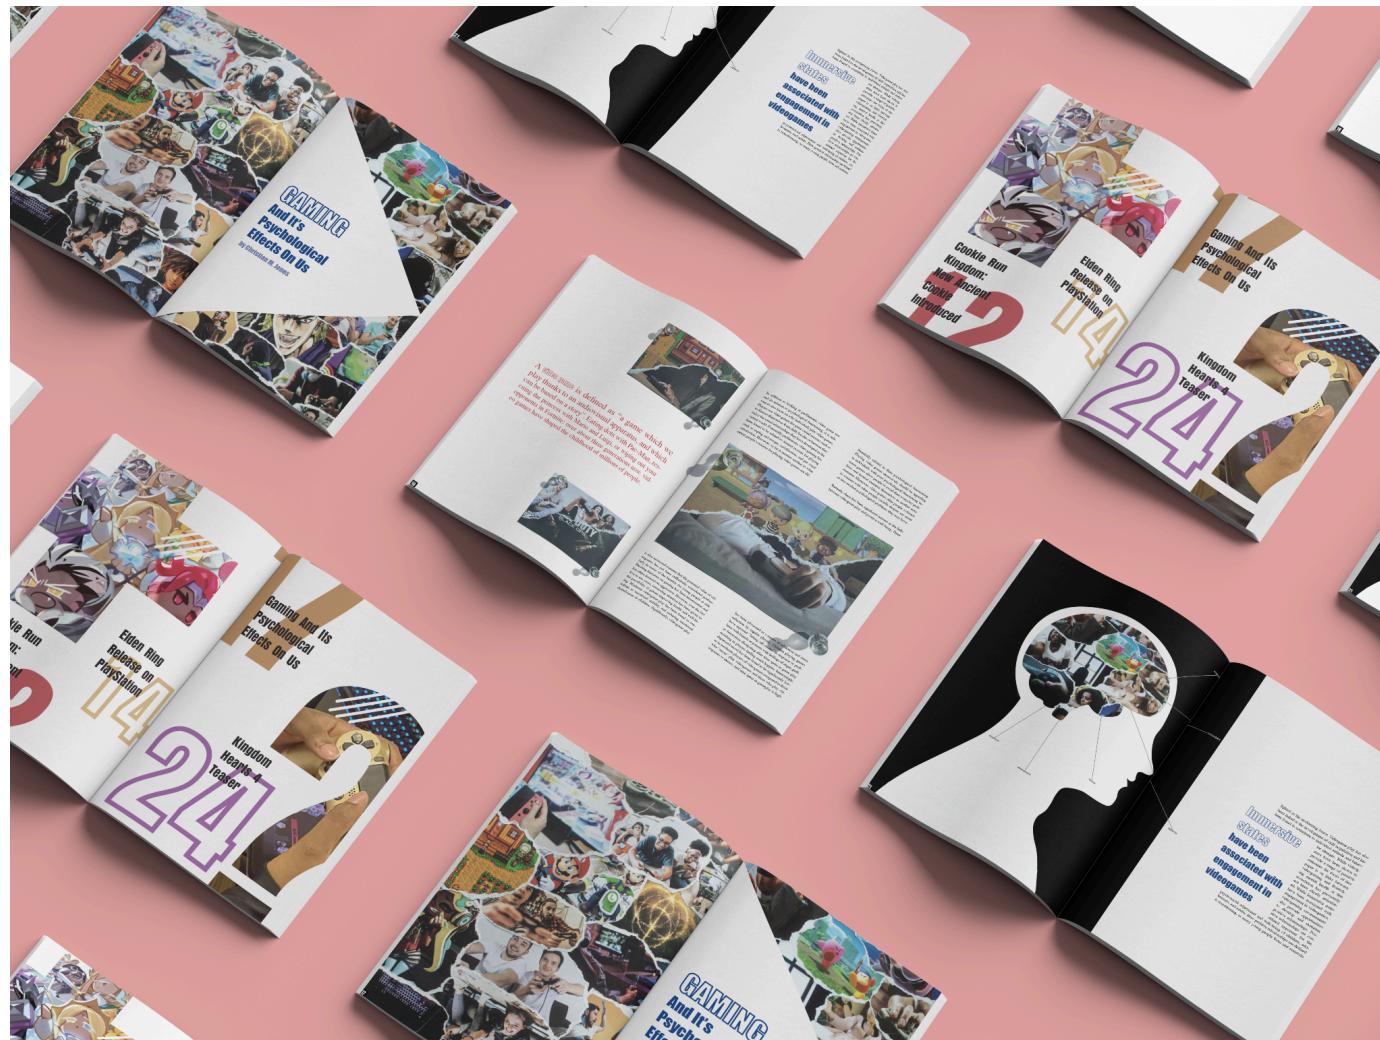

Book Design

Video games are one of the most popular forms of entertainment in the modern world, from as far back as Pac-Man to newer releases like Genshin Impact. But have we taken time out to study how they affect us psychologically? People have different reasons for gaming: from letting steam off to simply enjoying a virtual space with friends. This issue gives its readers a closer look at the possible effects that this hobby may have on them, be it positive or negative.

Letters To A Young Poet

Book Design

The theme of the images is 'patience', as they depict actions or occurrences that usually require a long amount of time eg. waiting for paint to dry, the ripening process of a bell pepper, knitting a quilt, etc.

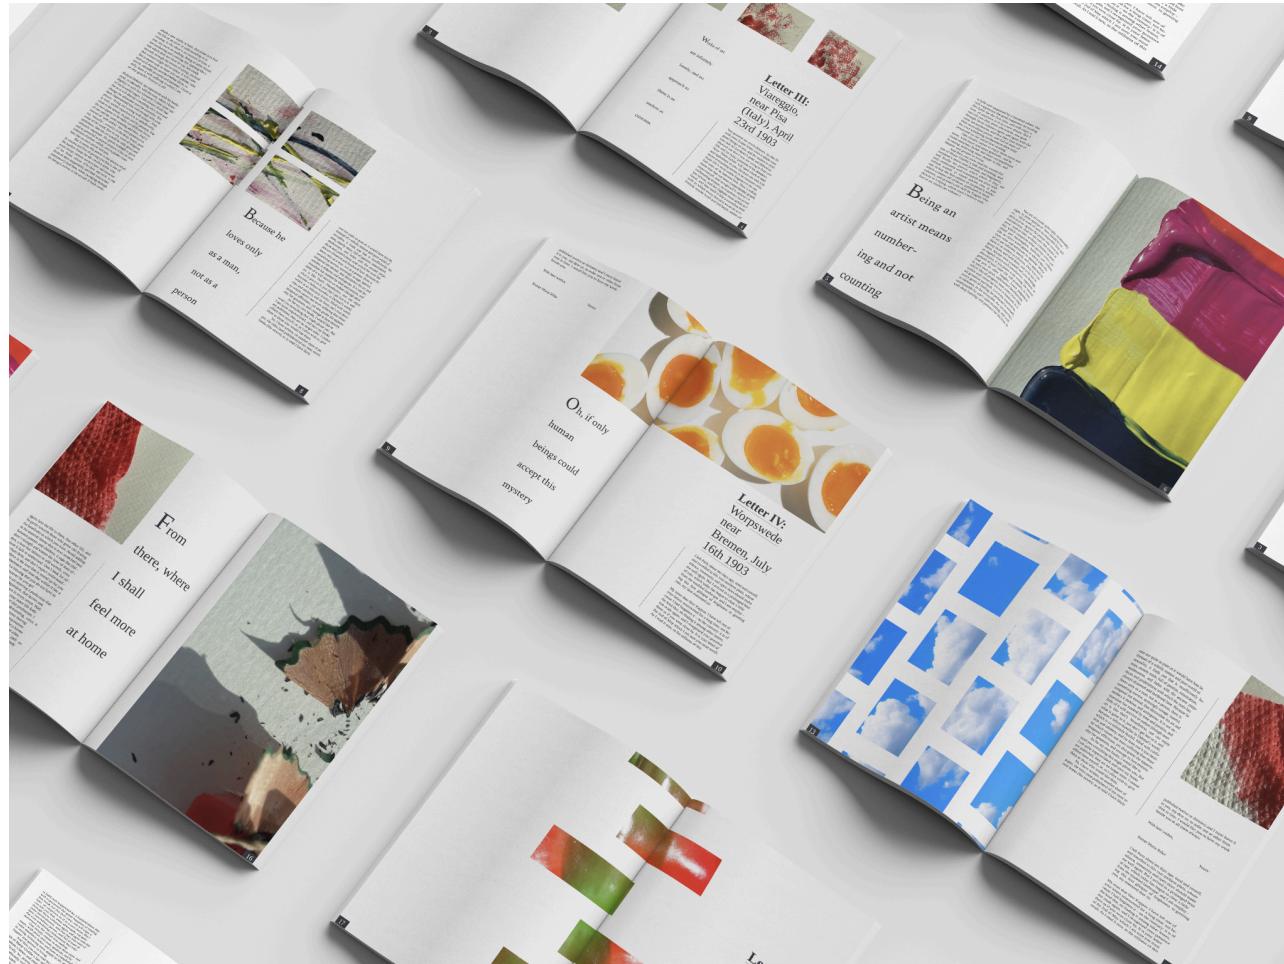

view wide and luminous in opposite. Works of art are infinitely lovely, and no approach to them is as useless as criticism. Only love can grasp them, and hold them, and so be fair to them. Love is the only true approach to things, as regards every such introduction, segment, or detail. And love is the only true approach to the growth of your inner life will probably, in time, lead you to other insights. Leave judgment to your critics, and let your heart be patient, while like all progress must come from deep within and never from without. It needs all generosity and birth, and even impressiveness, every germ of feeling, be perfumed in oneself, in darkness, in silence, in the depths of the unconscious, unsatisfiable by one's understanding, and wait with deep heart and patient for the hour in which the clear light comes that makes the life of an artist in understanding in its crest. In this way, the artist's life is patient; his years are nothing. Being an artist means not nibbling and coining, but opening like a tree which bears fruit in the season of its maturity through the storms of spring, unaffected that sometimes the fruit falls before it is ripe. This comes only to those who are patient, who exist as if eternally stretched before them, so unconcerned and indifferent. Learn it daily, learn it with suffering to which I am grateful! Patience is all!

Richard Dehmel: my experience with his books (which I have read many times, and know slightly) is such that whenever I come upon one of his beautiful pages, I am always afraid that there is something more to be said, that there is still more to say, that there is still more to change the admirable into the unworthy. You have to be patient with him, and with yourself, living and writing with ardor. And, in truth, artistic experience is so indefinitely close to the experience of life that I think that the two appear to be really just different forms of the same thing. And if we are patient, if instead of 'we' we 'make' one were permitted to say 'sexually,' sexually in the deep, broad, pure sense of the word, then, in the long, long silence, then his art would be truly great and infinitely important. His poetic strength is great indeed, and his poems are full of great, even rebuking rhythms which, and explodes from him.

But it seems this power is not always wholly sincere and free of posing (yet that is one of the most important qualities of his art, which must always remain unconscious and unaware of itself, as if it were a secret, as if it did not know of their importance and their untouched innocence!) And then, when sweeping through his being it arrives at the sexual, it finds some-

OREO is one of the most recognizable cookie brands in America if not the whole world. The OREO cookie comes in many flavors and sizes. Sometimes they're covered in chocolate, come in the form of an ice cream, and have even been adapted into drinks. At the end of the day, it all comes down to the original humble cookie: white cream sandwiched by two charcoal-colored disks.
